Summary

Full-Stack Developer with hands-on Python (Flask), React/Next.js, and REST API experience, building AI-integrated applications like an ML-powered agriculture platform and a full-stack marketplace. Comfortable working in AI-assisted development workflows — using tools like Claude for planning and coding agents for implementation. Looking to contribute as an AI Software Engineer building scalable backend and frontend systems.

Education

Silicon Institute of Technology

Bachelor of Technology in Computer Science & Engineering

CGPA: 8.24/10 (Currently)

Sambalpur, Odisha

Aug 2023 – May 2027

Skills

- **Languages:** C, Python, SQL, JavaScript, TypeScript, HTML/CSS
- **Frameworks & Technologies:** React, Node.js, Next.js, Express.js, Flask, Tailwind CSS, REST API
- **Tools:** Git, GitHub, Vercel, Render, Postman, Docker, Claude, ChatGPT, Cursor, GitHub Copilot
- **Database:** PostgreSQL, MongoDB, MySQL, Supabase
- **Soft Skills:** Problem Solving, Communication, Teamwork, Technical Documentation

Projects

FishMart - E-Commerce Platform | *TypeScript, React, Node.js, PostgreSQL* | [Link](#)

- Built **full-stack online fish marketplace** platform connecting buyers and sellers with clean, responsive UI/UX.
- Implemented **JWT-based user authentication**, and secure payment gateway integration.
- Designed scalable **RESTful API architecture** with Node.js/Express for handling transactions and inventory management.
- Deployed application using **modern DevOps** practices with CI/CD pipeline on cloud infrastructure.

SmartKrishi — AI-Powered Smart Agriculture System | *Python, React Native, TensorFlow, PostgreSQL* | [Link](#)

- Built an AI-powered smart agriculture Android app using **React Native and Flask (Python)**.
- Integrated crop recommendation (**Random Forest ML**) and plant disease detection (**MobileNetV2**).
- Added real-time weather, market prices, and multilingual AI chatbot (Hindi/English/Odia).
- Used **PostgreSQL** database and optimized backend with **11 REST API** endpoints.

Experience

Full Stack Developer (Intern)

Aug 2026 – Present(Remote)

Botspring LLP

- Working as the sole developer on RecruitOS, a SaaS recruitment platform for agencies, handling frontend, backend, and database.
- Built the frontend using Next.js (App Router), React, TypeScript, and Tailwind CSS, along with backend APIs and database design.
- Built features like CV parsing, agency login, and candidate pipeline management.
- Regularly use AI tools like Claude to speed up development and debugging.

Security Admin Associate L1 (Intern)

Aug 2025 – Nov 2025(Remote)

Infotach Solution

- Automated network log analysis and traffic monitoring using **Snort IDS on Linux-based environments**, reducing manual investigation time.
- Configured and managed virtualized lab environments using **VirtualBox, Kali Linux, and Ubuntu** for testing and system hardening.
- Documented security assessment workflows, incident reports, and technical findings for team review.

Certifications & Achievements | [Link](#)

- **Programming in Python** – GUVI
- **Letter of Recommendation (LOR)** – (eDC IIT Delhi)
- **Winner of RoboWar & Racing** – SIT (TechFest, 2024)
- **ByteVerse 7.0 Hackathon** – Participation at NIT Patna as Team Bitwiser
- **Geo-data Sharing and Cyber Security** – ISRO (IIRS Dehradun)
- **Quantum Computing** – C-DAC Hyderabad with IIT Roorkee

Hobbies

Playing Volleyball, Listening to Music
