SUMMARY

B.Tech CSE student with hands-on experience in cybersecurity and full-stack development. Skilled in penetration testing, vulnerability assessment, web application security, and MERN stack development. Familiar with network security, incident response, and ML-powered security, solutions and backend/frontend development.

EDUCATION

Silicon Institute of Technology

Bachelor of Technology in Computer Science & Engineering
CGPA: 8.25/10 (Currently)

Sambalpur, Odisha

Sept 2023 – Apr 2027

TECHNICAL SKILLS

Languages: C, Python, SQL, JavaScript, TypeScript, HTML/CSS, Bash, PowerShell

Frameworks & Technologies: React, Node.js, Express.js, Next.js, MongoDB, Flask, Firebase

Security Tools: Nmap, Burp Suite, OWASP ZAP, SQLmap, Wireshark, Gobuster, Kali Linux, Ubuntu

Cloud & Platforms: Vercel, Render, AWS, Oracle Cloud, Netlify

Specializations: Penetration Testing, Vulnerability Assessment, Web Application Security, Full-Stack Development (MERN + APIs), Machine Learning, Log Analysis, Incident Response, Threat Detection, Threat Detection, SIEM

PROJECTS

AI-Powered Phishing Detection System | *Python, ML, Flask, Android(Flutter)* | [Link](#)

- Developed a cross-platform phishing detection system using a Python-based Random Forest model trained on 200K+ URLs, achieving 89%+ accuracy.
- Automated feature extraction with Playwright, WHOIS, SSL, DNS, and HTML analysis for robust on real-time detection.
- Deployed the model as a RESTful Flask API to efficiently serve detection requests.
- Integrated the solution with a Chrome extension (JavaScript, HTML/CSS) and an Android app (Flutter, C++), enabling real-time protection on web and mobile.

SmartKrishi — AI-Powered Smart Agriculture System | *Python, React Native, TensorFlow* | [Link](#)

- Developed a full-stack Android app for smart agriculture using React Native (TypeScript) and Flask (Python) with PostgreSQL, featuring 11 REST API endpoints
- Engineered a Random Forest crop recommendation model (scikit-learn) achieving 99.3% accuracy and created a custom soil mapper to eliminate lab NPK testing.
- Implemented real-time plant disease detection using MobileNetV2 (TensorFlow, transfer learning) covering 15 disease classes on major crops.
- Integrated live weather data, mandi prices, and a multilingual (Hindi/English/Odia) AI chatbot for crop, market, and disease queries.

FishMart — E-Commerce Platform | *TypeScript, React, Node.js, MongoDB* | [Link](#)

- Developed a full-stack e-commerce platform connecting buyers and sellers with a responsive and user-friendly
- Implemented secure authentication, product management, and payment integration ensuring safe transactions
- Designed and optimized RESTful APIs using Node.js/Express for handling orders, inventory, and user data
- Integrated cloud deployment and CI/CD pipeline to ensure scalability, reliability, and continuous delivery

Face Recognition Attendance System | *Python, OpenCV, Deep Learning* | [Link](#)

- Built an automated attendance system using facial recognition, achieving 92%+ accuracy in real-time detection
- Implemented face detection and recognition using OpenCV and deep learning models for reliable identification
- Designed database system to store attendance records with timestamps and user identification
- Created user-friendly GUI for administrators to manage student profiles and generate attendance reports

EXPERIENCE

- Security Admin Associate L1 (Intern)**
Infotact Solutions

Aug 2025 – Nov 2025
Remote

 - Collaborated with IT and development teams to design, implement, and deploy secure systems and applications
 - Identified and mitigated security vulnerabilities using OWASP ZAP and Burp Suite across code, infrastructure, and configurations
 - Conducted security code reviews, audits, and threat modeling ensuring compliance with industry best practices
 - Monitored logs, alerts, and network traffic to detect and respond to potential security threats in real-time
 - Contributed to incident response planning, system hardening procedures, and comprehensive security report and documentation
 - Applied modern cybersecurity frameworks and methodologies to strengthen organizational defenses
- Graphic Designer (Intern)**
InAmigos Foundation

Feb 2025 – Mar 2025
Remote

 - Designed promotional materials, social media creatives, and branding elements for nonprofit outreach initiatives
 - Collaborated with cross-functional teams to deliver visually consistent designs aligned with campaign goals
 - Created engaging social media graphics that improved audience reach and engagement across platforms
 - Developed branding guidelines and designed campaign visuals to ensure consistency across initiatives while supporting fundraising and awareness efforts

CERTIFICATIONS & ACHIEVEMENTS | [Link](#)

- Winner of RoboWar & Racing** – SIT (TechFest, 2024)
- ByteVerse 7.0 Hackathon** – Participation at NIT Patna as Team Bitwiser
- Letter of Recommendation (LOR)** – (eDC IIT Delhi)
- All India NCAT (Naukri Campus Aptitude Test)** – Certificate of Merit
- Geo-data Sharing and Cyber Security** – ISRO (IIRS Dehradun)
- Google Cybersecurity** – Coursera by Google
- Introduction to Cybersecurity & Ethical Hacking** – Cisco
- Dark Web & SQL Injection Attacks** – EC-Council
- Quantum Computing** – C-DAC Hyderabad with IIT Roorkee
- Programming in Python** – Guvi

HOBBIES

- Playing Volleyball, Listening to Music
